

**INNOVATIVE AND ACCURATE  
e-DEVICES FOR AESTHETIC**

# How to inject easily dermal fillers with or without adjuvants?

New practices bring new challenges for filler providers willing to better serve patients, in a competitive market.

## Intuity® Mix: Easy-to-use mixing device for adjuvant and dermal fillers

But mixing needs to be done extemporaneously due to poor stability of these adjuvants to sterilization.

**Time consuming**  
for the doctor and assistant

**Complex**  
heterogeneous mixing, dosing errors, user dependent

**Not safe**  
bio contamination, needle stick injuries

## Intuity® Gel: Aided injector for dermal fillers

Injection of viscous dermal fillers are often associated with problems for patients, MDs and filler providers.

**Thumb tiring**  
 $20N < F < 100N$

**Loss of product**  
resilient injection

**Imprecise**  
inaccurate dosage

# Intuity® is our solution for easy preparation and injection of dermal fillers with or without adjuvant

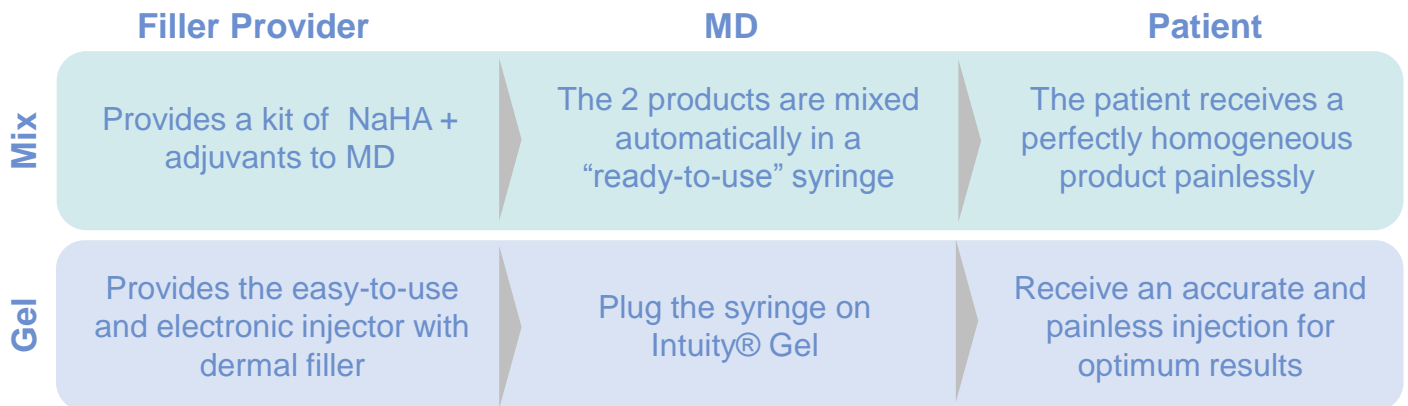

**Intuity® Mix:** Automated preparation, mixing dedicated to liquid-gel mixing, lyo reconstitution and emulsions

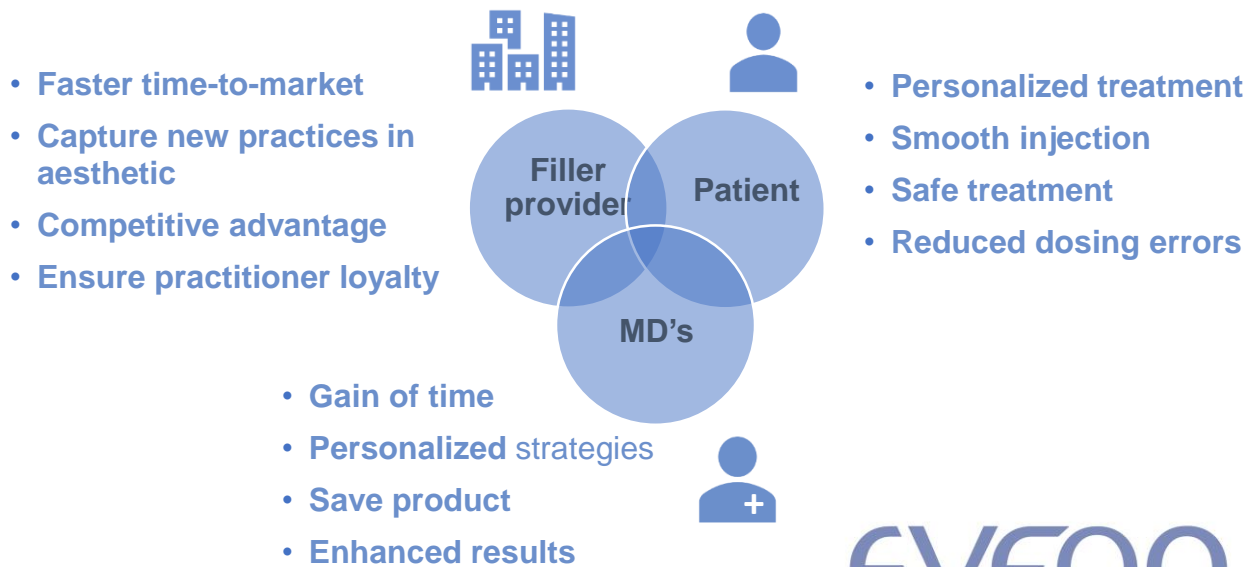

**Intuity® Gel:** Automatic and wireless injection device dedicated to viscous liquids and gel-like products

## How it would work?

## Value proposition

 <p><b>2009</b> incorporation</p>	 <p><b>100%</b> focused on medical devices design, development and manufacturing</p>	 <p><b>HQ in France (Grenoble)</b> <b>Office in US (Boston)</b></p>	 <p><b>~30</b> Employees 50% dedicated to R&amp;D</p>
 <p><b>Recognized partners</b></p>    	 <p><b>Intuity® technology platform</b></p> <p>13 patent families</p>	 <p><b>Strong internal skills</b> Microfluidics, Software, Electronics, Mechanics, Automation, Industrialization</p>	 <p><b>Strong Quality Management</b> ISO 13485 IEC 62304</p>
