

SAFE, SMART, PREPARATION and DELIVERY OF DIAGNOSTIC AND THERAPEUTIC RADIOPHARMACEUTICALS

Radiopharmaceuticals in diagnostics and therapeutic nuclear medicine applications set additional challenges.

Examples

- 1. Preparation ~24 steps of variable parameters
 - > potential sources of errors or contamination,
 - dose exposure due to the number of transfers,
 - careful process and dose adjustments required,
 - complex preparation and handling despite good therapeutic outcome.
- 2. Dose patient dependent kg mass & platelets count

Our solution

EVEON offers custom devices for **automated preparation and delivery** device with major benefits.

Intuity® Mix Pro safe and smart solution for radiopharmaceuticals preparation and delivery

Examples

Diagnostic Automated radiosynthesis

Immuno-radiotherapy Device for elution of target radionuclides

Curietherapy Intratumoral injection delivery device

Some of our partners

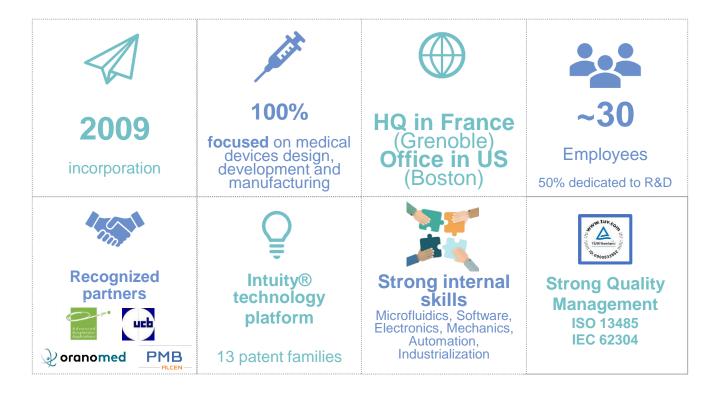

Value proposition

- Simple logistics
- Faster time-to-market
- Development tool
- Modularity
- Pharma Patient MD's
- Personalized treatment
- Time saving
- Reduced dosing errors
- Easier access to teratment

- Very precise dosage
- Reduce HCP exposure
- Smart: RFID, drug recognition, user ID data sharing via GSM...
- Reduced steps
