

# SAFE, SMART, PREPARATION and DELIVERY OF DIAGNOSTIC AND THERAPEUTIC RADIOPHARMACEUTICALS

# How to prepare & administer radiopharmaceuticals?

Radiopharmaceuticals in diagnostics and therapeutic nuclear medicine applications set additional challenges.

Radiation safety

Time sensitive logistics

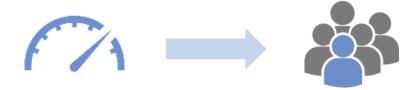

Complex manipulations

### **Examples**

- 1. Preparation ~24 steps of variable parameters
  - potential sources of errors or contamination,
  - dose exposure due to the number of transfers,
  - careful process and dose adjustments required,
  - complex preparation and handling despite good therapeutic outcome.
- 2. Dose patient dependent kg mass & platelets count

### **Our solution**

EVEON offers custom devices for **automated preparation and delivery** device with major benefits.

Modular

Safe

**Simple** 

# Intuity® Mix Pro safe and smart custom-made solution for preparation and delivery

### **Examples**

**Diagnostic**Automated radiosynthesis

Immuno-radiotherapy
Device for elution of
target radionuclides

Curietherapy
Intratumoral injection
delivery device

### Some of our partners

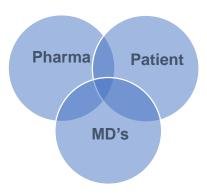

## Value proposition

- Simple logistics
- Faster time-to-market
- Development tool
- Modularity

- Personalized treatment
- Time saving
- Reduced dosing errors
- Easier access to teratment

- Very precise dosage
- Reduce HCP exposure
- Smart: RFID, drug recognition, user ID data sharing via GSM...
- Reduced steps

2009

incorporation

100%

focused on medical devices design, development and manufacturing

**France** 

Headquarter

**Employees** 

50% dedicated to R&D

Recognized partners

**Intuity®** technology platforms

13 patent families

#### Strong internal skills

Microfluidics, Software, Electronics, Mechanics, Automation, Industrialization

**Strong Quality** Management **ISO 13485 IEC 62304**
