

Transforming Patient Experience

**SAFE, SMART, PREPARATION and
DELIVERY OF DIAGNOSTIC AND
THERAPEUTIC RADIOPHARMACEUTICALS**

How to prepare & administer radiopharmaceuticals?

Radiopharmaceuticals in diagnostics and therapeutic nuclear medicine applications set additional challenges.

Radiation
safety

Time sensitive
logistics

Complex
manipulations

Examples

1. Preparation ~24 steps of variable parameters

- potential sources of errors or contamination,
- dose exposure due to the number of transfers,
- careful process and dose adjustments required,
- complex preparation and handling despite good therapeutic outcome.

2. Dose patient dependent kg mass & platelets count

Our solution

EVEON offers custom devices for **automated preparation and delivery** device with major benefits.

+

Modular

+

Safe

+

Simple

Intuity® Mix Pro safe and smart custom-made solution for preparation and delivery

Examples

Diagnostic
Automated
radiosynthesis

Immuno-radiotherapy
Device for elution of
target radionuclides

Curietherapy
Intratumoral injection
delivery device

Some of our partners

Value proposition

- Simple logistics
- Faster time-to-market
- Development tool
- Modularity

- Personalized treatment
- Time saving
- Reduced dosing errors
- Easier access to treatment

- Very precise dosage
- Reduce HCP exposure
- Smart: RFID, drug recognition, user ID data sharing via GSM...
- Reduced steps
